

# Gold Coast Hockey Centre

QUEENSLAND DEPARTMENT OF STATE DEVELOPMENT | LABRADOR QLD

Alder Constructions delivered the refurbishment and upgrade of the Gold Coast Hockey Centre ahead of the 2018 Commonwealth Games, showcasing its combined civil infrastructure and building construction expertise.

The works included construction of a new club house, refurbishment of the existing club house, construction of two new FIH world standard hockey pitches, new entry road, carpark areas and landscaping. The existing ground conditions did not accommodate the new pitches and extensive earthworks needed to be undertaken to remediate the subsurface.

The end result was the successful opening of a modern, state-of-the-art hockey facility.
